

Before Cleaning:

The screenshot shows a database interface with a query editor at the top containing the SQL statement `select * from pizza_recipes`. Below the editor, a tab labeled `pizza_recipes 1` is active. The results are displayed in a grid view with two columns: `123 pizza_id` and `A-z toppings`. The data is as follows:

	123 pizza_id	A-z toppings
1	1	1, 2, 3, 4, 5, 6, 8, 10
2	2	4, 6, 7, 9, 11, 12

After Cleaning:

The screenshot shows the same database interface after cleaning. The query editor now contains `select * from pizza_recipes_clean`. The results are displayed in a grid view with two columns: `123 pizza_id` and `A-z toppings`. The data is as follows:

	123 pizza_id	A-z toppings
1	1	1
2	1	2
3	1	3
4	1	4
5	1	5
6	1	6
7	1	8
8	1	10
9	2	4
10	2	6
11	2	7
12	2	9
13	2	11
14	2	12
